

BIO-RUST

The product for the **fast and reliable removal of rust from metals in the pH-neutral range**. Smoothly removes rust from surfaces without affecting the material. Slight rust films, fingerprint corrosion, and thick rust layers as well as tarnish from brass and copper are effectively removed.

- **Free from halides**
- **Not subject to mandatory labelling in accordance with the European Directive**
- **Already operates at ambient temperature, ultrasonic will support the effect**

Fields of use • Universally applicable in the derusting of steel- and iron parts

- Application in immersion processes (Clean Box) or ultrasonic devices
- Removal of oxide layers from brass and copper
- pH-neutral

For the Clean Box also see p. 44.
