

CB 100

bio-chem CB 100 is the **cleaner** that benefits from the **power of Nature**. The water-based cleaner with its pleasant scent is produced from renewable raw materials derived from recycled products. These natural active substances provide the cleaner with its strong dissolving powers. The surface remains unaffected, and the original finish is restored.

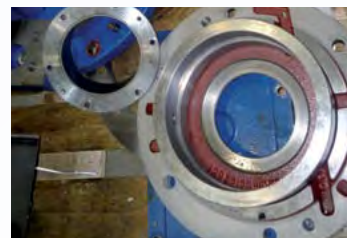

➔ VOC-free – environmentally compatible and user-friendly

➔ Water-based

➔ Not subject to mandatory labelling in accordance with the European Directive, reduces hazardous substances

➔ Virtually residue-free

Nonfood Compounds
Program Listed (146719)
(C-1)

Fields of use • Universally applicable in the manual cleaning of strong contaminations in all fields of the industry

CB 100

- Engine maintenance
- A substitute for paraffin in cleaning
- Can be used in ultrasonic cleaning devices
- Optionally applicable in the pre-cleaning of particularly persistent contaminations in the BIO-CIRCLE

NEW

Equipped with a special aluminium formula that protects aluminium and brass. Even the most persistent contaminations, e.g. on components, **can be removed efficiently without tarnishing the materials. With efficient corrosion protection.** Active at ambient temperature and when heated. Suitable for mechanical and manual cleaning. Can be heated to 40°C/104°F max.

NEW

Foamless cleaner for mechanical and manual cleaning. Suitable for use in cleaning systems, e.g. HTW, BIO-CIRCLE Turbo HP, Clean Box Flow. An environmentally compatible and user-friendly VOC-free substitute for solvents.

Optimal cleaning results also at ambient temperature – low-energy.
