

HTW – Hot-Water Parts Washer

Sturdy, fully automatic cleaning device for one-step cleaning and degreasing of small parts

A maintenance-friendly **high-pressure spray system**, equipped with a special nozzle system, provides for thorough cleaning and degreasing of tools and other parts. Due to the powered rotating rack and the spray pressure the bio-chem cleaners in the hot-water parts washer have an optimal effect on the items to be cleaned.

- ➔ **Made completely from stainless steel, for automatic cleaning at acidic, neutral and alkaline pH-values**
- ➔ **Power-actuated rotating rack**
- ➔ **Powerful stainless steel pump**
- ➔ **Design, easy handling, excellent cleaning power**

Fields of use • Efficient and cost-saving parts cleaning in maintenance, production, manufacturing, and the service industry

Tip:

Thanks to our comprehensive accessories range we can guarantee individual and process-oriented customizations.
