

# Power Cleaner **DB**

bio-chem Power Cleaner DB is the highly effective, efficient and thus economical **water-based acidic cleaner** for the removal of even the most persistent of mineral deposits. Thanks to new active substances that stand out for their unique set of features Power Cleaner DB fulfils all requirements on perfect cleaning. bio-chem Power Cleaner DB is strong against deposits. It can be used when different materials and metals have to be cleaned. The acidic active substances of the Power Cleaner DB are less corrosive than conventional acids on plenty of materials. Moreover the cleaner is non-oxidizing. It contains no chlorides or other halogen compounds.

➔ **Good thermal stability, can be heated up to 60°C/140°F**

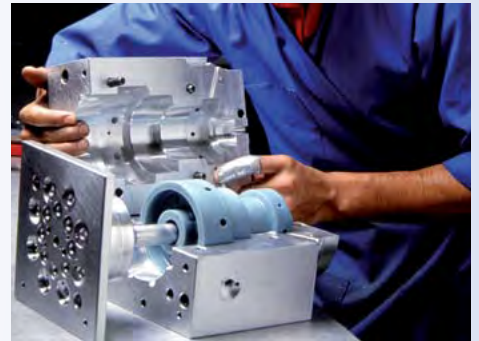

➔ **Foamless**

➔ **Low-odour, no caustic fumes**

➔ **Free from phosphates, phosphoric and hydrochloric acid**

**Fields of use** • For mechanical cleaning

- High dissolving power on limescale, urine scale and other persistent mineral deposits
- Particularly powerful system cleaner for the removal of limescale, rust, urine scale and other mineral deposits when cleaning and flushing pipes, coolers, or other systems in pipe- and heat exchanger cleaning devices (RWR)

Suitable for the mechanical removal of limescale, rust, and urine scale (e.g. cleaning of **vacuum toilets, flushing of pipes**). **Spray-degreasing systems (HTWs) are decalcified, lime and other mineral deposits are removed.**

Foamless.
