

UNO SV

Phosphate-free water-based **intensive cleaner** (highly concentrated, dilutable with water to 1:40) for removing resinous oils and greases, pigment coatings and other residues. Its excellent dissolving performance already achieves optimal cleaning results at ambient temperature.

➔ **Surfactants are biodegradable in accordance with European Regulation**

➔ **Replaces CHC and other solvents**

➔ **Material-friendly yet strong cleaning power**

➔ **Good wetting properties, acts fast and in depth**

➔ **Not subject to mandatory labelling in accordance with the European Directive**

Nonfood Compounds
Program Listed (141942)
(A1)

Fields of use • Manual and mechanical cleaning and degreasing in the metalworking industry

- Cleaning of canteen kitchens, especially removing of heavy pollution around the exhaust air units and on ceilings and walls around the cooking area
- Plastics industry – removing of release agent- and plastics residues from tools and moulds
- Printing industry – cleaning of flat screen and rotary printing machines, screens and templates
- Cleaning before varnishing as an alternative to solvents
- Maintenance of engines and gearboxes
- Sawmills – removing of resin, sawdust and dust from chains and conveyor belts

Please note:
Do not use
the concentrated cleaner on
aluminium and zinc coatings!

For application on
perpendicular and
other vertical surfaces.
